About Me

Aiming to dive deep in a new career as web developer, I have been training with modern technologies such as HTML, CSS, JavaScript, React, Node.js, and Angular. Skilled in agile methodologies, building responsive applications, and integrating RESTful APIs.

Great skills developed through a background in psychology, including empathy, problem-solving, and effective communication, enhance the ability to understand user needs and collaborate within multidisciplinary teams. Highly interested in refining my new skills and creating practical solutions, with a focus on clean code. Currently seeking opportunities to contribute to projects that combine technology and meaningful work.

Education

 Bachelor in Psychology

Centro Universitário de Brasília, Brazil

2005 - 2010

 Full Stack Web Development

Career Foundry

2024 - 2025

Languages

 Portuguese

first language

 English

conversation skills

basic skills

Skills

Front End Development

- HTML, CSS, JavaScript, Typescript
- Libraries / Frameworks (React, Redux, Angular, Bootstrap, SASS / SCSS, J Query)
- Responsive design
- AJAX, JSON
- Version Control (Git)
- Test- & Behavior-Driven Development (unit testing, integration testing, acceptance testing, and end-to-end testing
- Continuous Integration / Delivery
- Functional Programming and Beginner Object Oriented Programming
- Mobile Apps (React Native, Expo, PWA)

Back End Development

- NodeJS & Express
- APIs (JSON, RESTful, Postman)
- Hosting & Web Services (AWS, Google Firestore, Heroku, Netlify)
- Relational & non-relational databases (PostgreSQL, MongoDB)

Web Development Projects

Pokedex

The Pokedex Web App provides a user-friendly interface to browse through various Pokémon and their details. It utilizes HTML, CSS, JavaScript, and jQuery along with Bootstrap framework for styling and responsiveness.

Portfolio Project

This is a simple portfolio project created using only HTML and CSS. It showcases skills, projects, and contact information in a responsive layout.

Movie API

This project is a Movie API that provides access to information about different movies, directors, and genres. Users can sign up, update their personal information, and list their favorite movies. The API is built with Node.js and uses MongoDB for data storage.

Movieverse Angular Client

My Flix Angular Client is a single-page, responsive movie app built with Angular. The client-side application consumes a REST API backend, allowing users to explore information about various movies, directors, and genres, as well as manage their user profiles.

Chat App

Chat App is a mobile messaging application built with React Native and Expo, designed for real-time communication. The app allows users to chat with friends and family, share images, and exchange location data. It also features offline message reading, making it a reliable communication tool. The app ensures accessibility for users with visual impairments by supporting screen readers.

Shopping List App

A shopping list application built with Node.js, Expo, and React Native, utilizing Firebase Firestore for data storage. This app allows users to create and view shopping lists with anonymous authentication to keep the experience simple and secure.

MyFlix

MyFlix is a movie application built with React and Parcel. This application allows users to view and search for movie information.

Work Experience

 Psychologist

FEBRUARY 2009 – DECEMBER 2010

Internship in social psychology, organizational and occupational psychology, hospital psychology, clinical psychology (Gestalt therapy)

 Sales

Livraria Cultura (Brazil)
